

AguaMaxTM
Clean Better. Improve More.

AguaMax™ Clean better. Improve more.

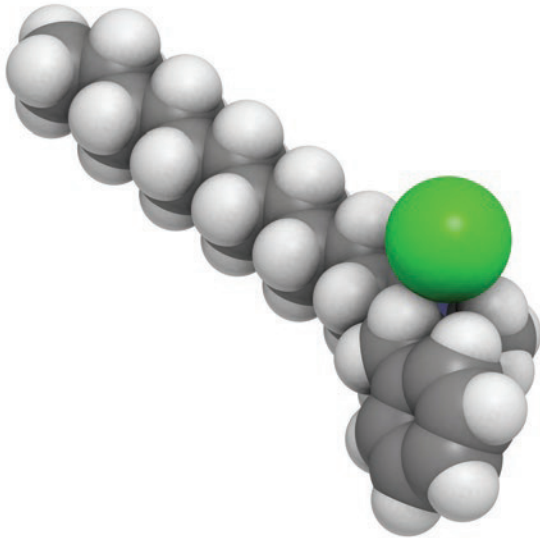

Water quality issues

Produced water quality is dependent upon a wide variety of factors, including the presence of bacteria causing solids and a sour environment, iron sulfide causing solids and black water. These solids can provide surfaces for oil to adhere to in the formation or your system causing high oil content. At X-Chem, we know the better your produced water quality is the greater your productivity will be which contributes to your bottom line. Our highly experienced technical experts will evaluate your water quality issues and develop a cost-effective treatment program suited for your production challenges.

Clean better. Improve more.

AguaMax™ products

X-Chem offers a wide variety of AguaMax™ water treating products, including but not limited to: surfactants, iron sulfide dissolvers, water clarifiers, anti-foulants, defoamers, friction reducers and oxygen scavengers.

Application

- Gas wells
- Oil wells
- Flowing wells
- Pumping wells
- Gas lift
- Power oil lift
- Pipelines
- Tubing batch
- Casing batch
- Side-steam flush
- Truck treating
- Formation squeeze
- Flowlines
- Surface equipment
- Water disposal
- Injection wells
- Capillary tubing

Benefits

- Increase production.
- Improve injectivity of produced water.
- Recover more sellable oil from produced waters.
- Meet discharge requirements for produced water.
- Fewer equipment failures.
- Leaves clear water with less suspended oil or solids.
- Reduce corrosion in your system.
- **Clean better. Improve more.**

“The better your produced water quality is the greater your productivity will be which contributes to your bottom line.”

Clean better. Improve more.
